Linda,  
Is this an FDA or USDA question? The first few were sent to usda, but is  
it  
and FDA issue?

Question:

I'm not sure if I am sending this to the right place or not. I hope you  
will  
refer my request as appropriate.  
I am concerned about the forced molting of  
hens used in egg production- both because it is cruel and because of  
increased  
spread of salmonella enteritidis. Please eliminate this practice by  
granting  
the petition filed under docket #98P-0203/CP.

Thank you very much for your  
attention to this matter.

Sincerely,

Sarah Conroy
